Examiner	:	Jean-Louis, Samira JM			
For	:	ANDROGEN PHARMACEUTICAL COMPOSITION AND METHOD FOR TREATING DEPRESSION			

SUPPLEMENTAL STATEMENT OF THE SUBSTANCE OF THE INTERVIEW

FILED VIA EFS

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sirs:

In accordance with 37 C.F.R. 1.2 and M.P.E.P. Section 713.04, Applicants respectfully submit this Supplemental Statement of the Substance of the Interview in reply to the Interview Summary mailed on January 6, 2011, for the patent application referenced above.

Applicants acknowledge with appreciation the courtesy extended by Examiners Jean-Louis and Supervisory Patent Examiner Padmanabhan during the in-person interview with the undersigned on December 17, 2010. Applicants have received and reviewed the Interview Summary mailed by the Examiner on January 6, 2011, and provide the following statements to supplement and clarify the summary provided by the Examiners.

As evident from the Interview Summary, the Information Disclosure Statements (IDSs) filed by Applicants were discussed during the interview. A separate interview summary was issued for this portion of the discussion on December 28, 2010.

Applicants have submitted a Supplemental Statement of the Substance of the Interview in response to the December 28, 2010 Interview Summary.

During the interview, Applicants also summarized the Request for Continued Examination and Preliminary Amendment that had been filed in the present case on November 12, 2010. Applicants noted for the Examiners that the Preliminary Amendment presented new claims 54-59 directed to the composition recited in the allowed method claims.

Applicants and the Examiners further reviewed the allowable subject matter and priority date of this application. The Examiners will act on this application in due course, noting that either an allowance would be maintained and/or a restriction may be issued. No exhibits were demonstrated.

Applicants appreciate in advance the assistance of the Examiners, and look forward to the further prosecution of this and the related U.S. patent applications.

Respectfully submitted,

Date: January 28, 2011
